

MPSI ENVIRONMENTAL POLICY STATEMENT

MPSI acknowledges its responsibilities in minimising its impact on the environment.

We are committed to meeting the requirements of global environmental laws and regulations.

Our impact on the environment in terms of waste and pollution is already minimal but we remain committed to identifying further ways to reduce energy consumption, materials and operational waste.

We actively seek to re-use and recycle as many materials as possible within our day to day operations.

These objectives have been communicated to all MPSI employees.

MPSI undertakes to communicate our general principles to our suppliers and cooperate with our customers in helping them achieve their own objectives and environmental initiatives.

Brett Markham, Operations Director
MPSI Limited, August 2015
